

ABSTRACT

A portable communications terminal has
display part having a display surface for displaying an
image;

main body having at least an antenna for transmitting
and receiving radio waves for wireless communications, a speaker
for outputting voice, and a pointing device for controlling
at least a cursor displayed on said display surface; and

joining part for joining said display part to said main
body in an angularly movable fashion, and wherein:

said speaker is disposed on one main surface of said main
body, and

said pointing device is disposed on the other main surface
of said main body opposite from said one main surface.
